### For A Cleaner City.

Versailles, Mo., August 3, 1910.

To the People of Versailles:—

Your Mayor and Board of Aldermen and City Physicians deem it best to warn you concerning the sanitary conditions of our City. Owing to the rank growth of vegetation and the carelessness of many of our citizens about their premises, and especially their water closets, the health of the community is threatened.

The city officials are ever ready to co-operate with you to better the conditions of our little city and make it a better place to live in. At the same time we propose to do our full duty and see that better sanitary conditions are obtained.

We are going to ask, and if necessary, require, that all the weeds about the alleys and premises of all be cut and kept cut and where there is a rank growth the weeds, after being cut, must be hauled away. We must also require that you keep your water closets in a good sanitary condition all the time. Also that where slops or other refuse from the house and kitchen are thrown on the ground that you keep these places covered with fresh lime to kill all disease germs that may be caused by the slops and the gathering of flies thereon. Until cold weather time should be kept in the water closets and used freely every day. Or, if you prefer, empty all your clean wood ashes into the closets.

If you will follow these simple and easy requirements the health of the community will be better, and you may avoid a serious illness in your own family.

Yours for a cleaner city,

F. D. HARRISON,

Mayor and ex-officio President of Board.

H. N. LUTMAN,

R. Q. KELLEY, City Physicians.
